"These Guys Think Gaiares Is Awesome."

Jamie Bunker
Professional Gamer

"I Happen To Agree."

There you have it. The critics agree that Gaiares is one of the hottest games around. In fact, once Dr. Dave of GAMEPRO Magazine got his hands on the 8 meg fighting power of Gaiares, he gave it a perfect  score, and stated, "Novice space jockey's need not apply". Then came Electronic gaming Monthly magazine.

They were so impressed with Gaiares, they couldn't put it down. They said "Games just don't get any better than this. Gaiares is Phenomenal! 8 Meg of incredible graphics put it in a league all its own. If you thought the lava in the TF-3 was intense, wait till you see the hyperspace scene!"

So now that you know what the pro's think, go experience the awesome Gaiares for yourself. And watch out for the bosses.

8
With 8 Megs of graphics, Gaiares is one of the most visually impressive games ever. The space jockey's need not apply. The game is so intense, it's hard to believe it's a video game. The graphics are so good, it's like you're in the game. The game is so intense, it's hard to believe it's a video game. The graphics are so good, it's like you're in the game.
